

USABILITY REPORT

HireUp

11:11PM

USER QUOTES

"Quite surprised at the accessible UI, happy with the results" —
Simran

"It's a well developed, easy to use app for people to use instead
of LinkedIn" — Ira

"The mic works perfectly, it detected what I said immediately" —
Yatri

"I'm from Instrumentation Engineering — there was no option
for core engineering branches, only CO/IT" — Krish S

"One would benefit if more specific filters were there instead of
broad fields" — Tanaya

"Beginner friendly. Focus seems more on UI than actual content"
— VK

TESTING NOTES

Filtering is too limited (no salary, experience, branch-specific, or "latest post" filters)

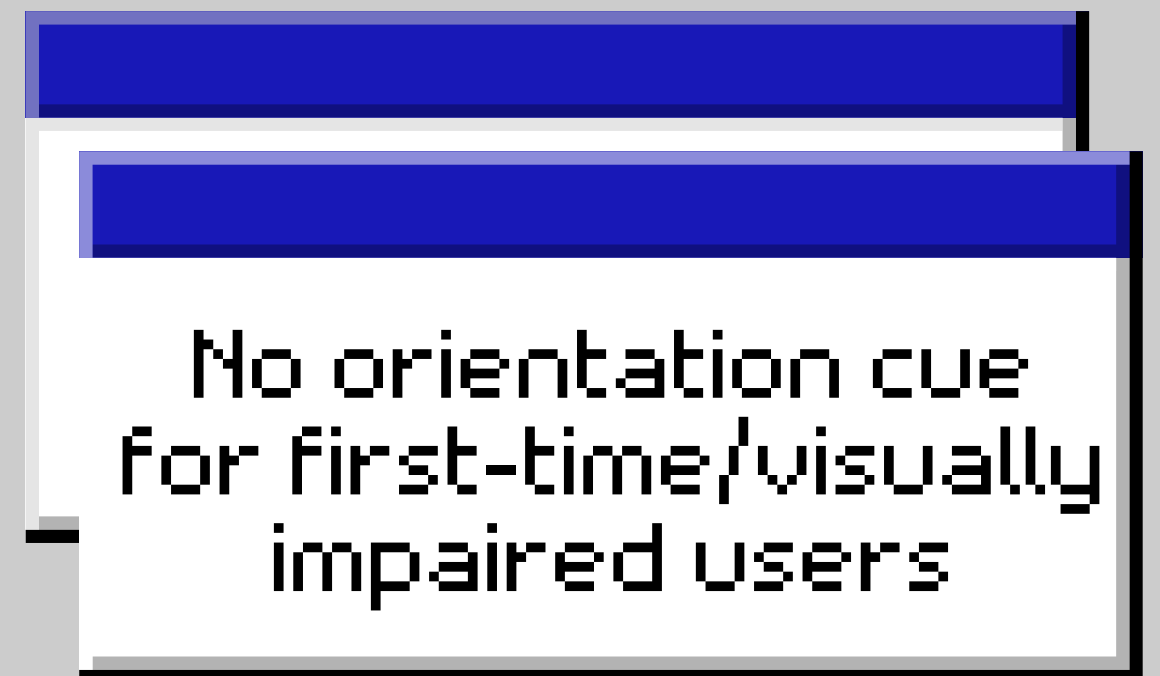

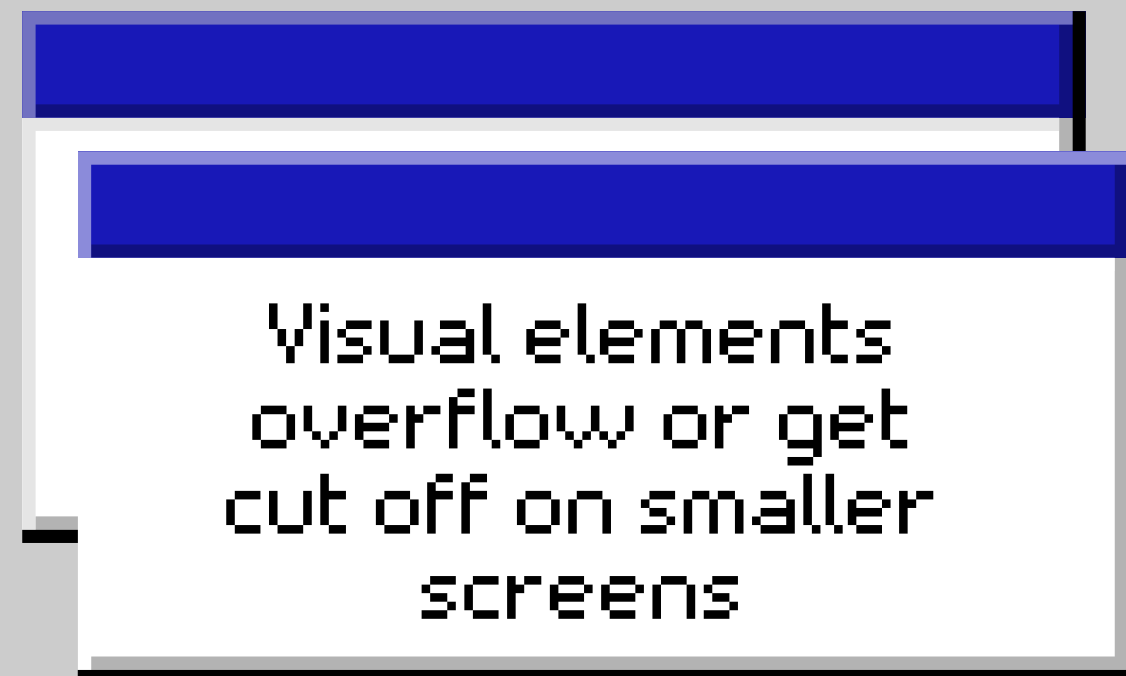

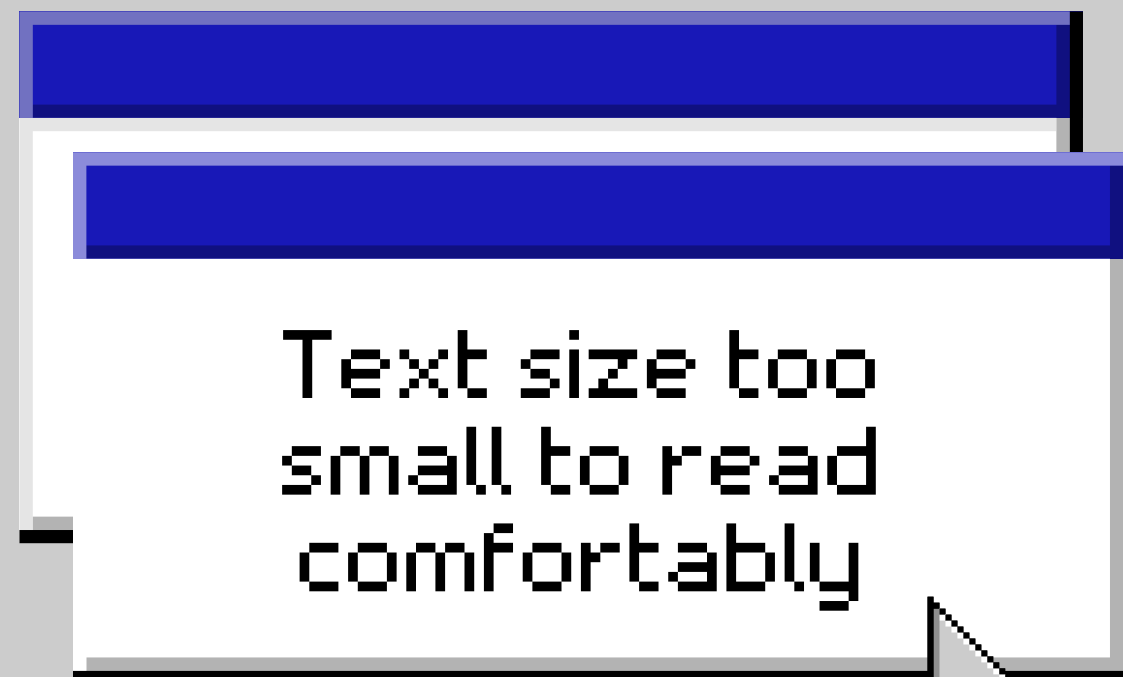

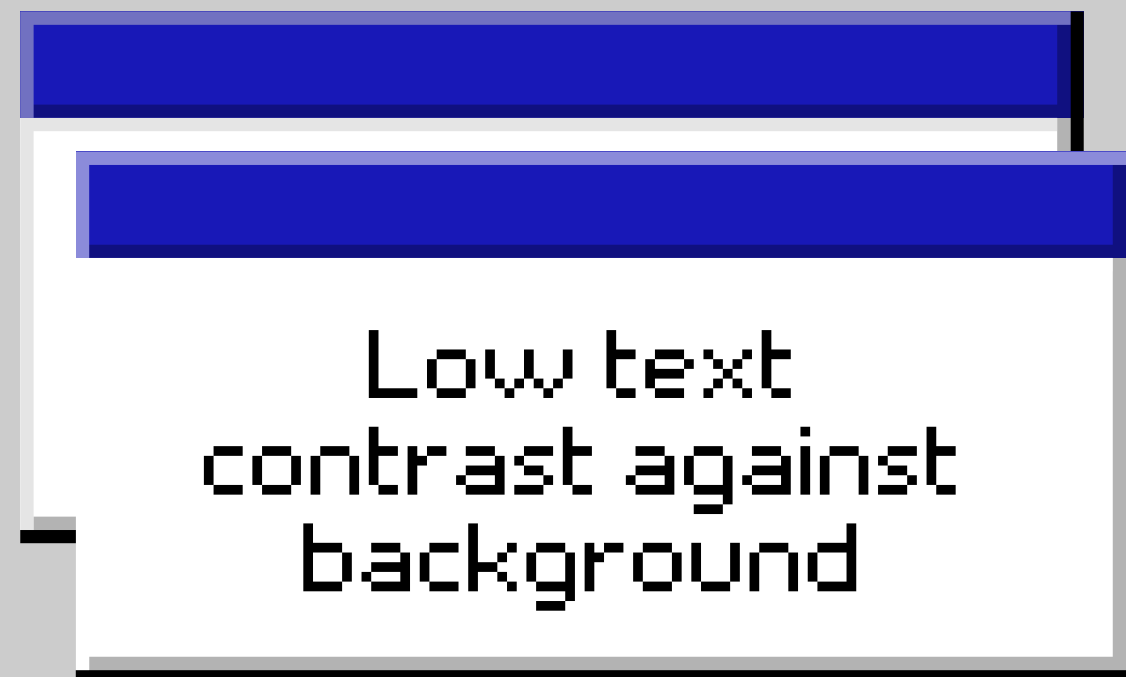

"No results found" for valid search terms

Filters non-functional / search input unresponsive

Slow load times

Redirects straight to application/email without showing eligibility/deadline first

Miscategorized listings (e.g., Policy category showing Sales/IT jobs)

DESIGN FIXES

- 1) Changed the app's colour theme and improved the layout.
- 2) Feedback button added for the companies and the app.
- 3) Inclusion of additional languages along with Hindi and English.
- 4) More core professions for listing references to connect with jobs.
- 5) Inclusion of more search filters like salary preferences and job profile requirements.
- 6) "Welcome to HireUp" announcement feature when the app opens to enhance accessibility.
- 7) Text Size Increased
- 8) Fixed responsive layout for smaller screens
